

Front Range Region Grant Report from St. Benedict Health & Healing Ministry

Adapt! Learn! Change! Grow! Those have been the mantras of our organization the past year. We had to adapt during COVID-19, to be able to continue to provide health services for our vulnerable populations. As local area churches and community centers closed their doors to the public, we no longer had indoor space with which to hold our weekly clinics. Thanks to your support we were able to purchase a mobile clinic and immediately put it into service. With our mobile clinic we have added new clinic sites and have been going out into communities providing much needed care including COVID-19 vaccines. We have been able to provide care for homebound individuals who could not leave their homes for vaccines or check-ups. We were celebrated by the Colorado Safety Net Collaborative with the 2021 Innovative Care Site Award. God has truly blessed our ministry, kept us safe, answered prayers, and allowed us to continue our vital mission in the community.

Thank you again for believing in our mission and for supporting us!

Shelly Dierking
