Re: St. Patrick's Grant Report - St. Luke's in the Desert

Greetings Southwest Region,

St. Patrick's received a grant from the Southwest Region for \$2,800 to purchase mini-split units for St. Luke's in the Desert Meeting Hall. The mini-splits are part of an ongoing infrastructure and building upgrade for the purpose of bringing the building up to code, and providing cooling for the hot months in the desert.

St Patrick's Navajo Land Ministry which includes St. Luke's, contracted with an electrician who has agreed to bring the electrical systems to current UBC regulations at a reduced cost. This was necessary in order for the cooling systems to operate with adequate electrical load. This work is ongoing, and the cooling units are expected to be ordered this week, and installed sometime in October.

St. Patrick's relationship with the Navajo community at St. Luke's is longstanding. We continue to nurture this friendship and walk alongside this community in Christ's love while together we enhance the quality of shared lives in this region.

We are grateful the grant from the Southwest Region in supporting the ECN and specifically St. Luke's in the Desert.

Respectfully Submitted,

The Reverend Deacon Wendy McAllister
St. Patrick's in Pagosa Springs
